

Sustainability at Gojek

We're committed to creating **positive impact** and **long-term value** for **people** and **planet**, through all that we do.

Tanah Sullivan

Group Head of Sustainability, Gojek

Gojek Sustainability Focus

Integrate sustainability into all of Gojek policy and operations

To ensure we are at the highest levels of environmental, social and governance best practices.

Transition to a low carbon economy

Build and strengthen Gojek's resilience and preparedness for a transition to a low carbon economy.

Accelerate with technology and innovation

We leverage technology to close some of the gaps in our own expertise and capacity in order to do business better.

#gogreener

Our approach is to **reduce and avoid** first, and offset what we cannot. We want to **incentivize and encourage** all in our ecosystem to do the same.

Avoid

Reduce

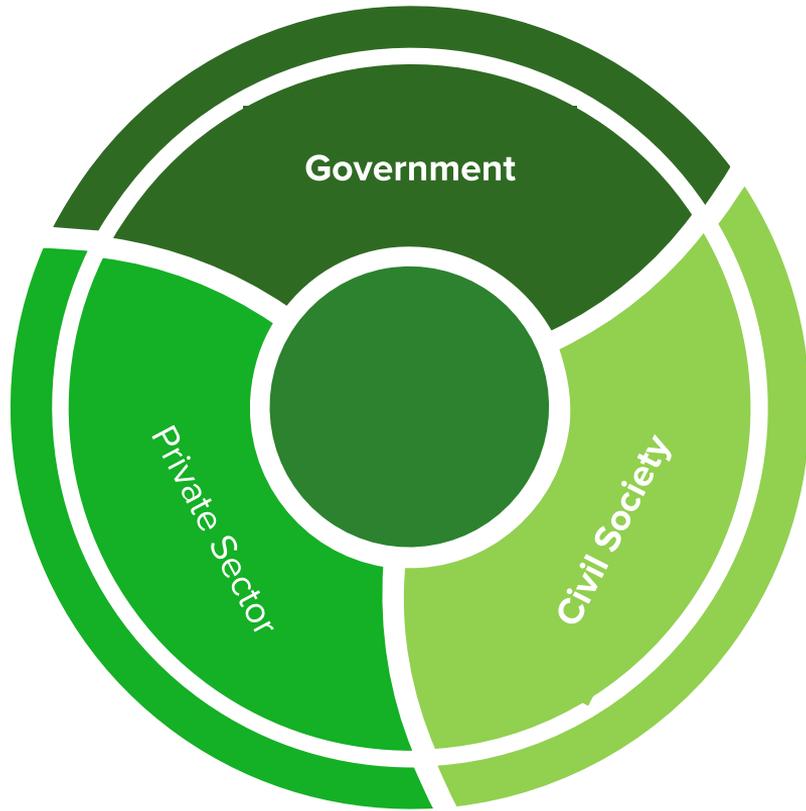

Offset

We believe collaboration is key

With a multi-stakeholder approach, Gojek will continue to innovate and collaborate with the government, state-owned enterprises, IESR and other sectors, to use technology to find meaningful ways in creating long-term value for people and the planet.

We believe shifting to a decarbonized, decentralized and digitalized energy system, as well as an electrified transportation system, can help make a sustainable and healthier planet.

Thank you!
