Global companies reporting
operations in Indonesia

Who are we?

RE100 is a leadership movement. The world's most influential companies, committed to sourcing 100% of their global electricity consumption from renewable sources, and driving global change.

Our policy work

The RE100 campaign has six global policy messages or principles to guide our advocacy work to enable renewable electricity to be sourced globally at a reasonable cost.

#1. Affordability: Create a level playing field on which renewable electricity competes fairly with fossil-fuel electricity and reflects the cost-competitiveness of renewable electricity.

#2. Ambition: Remove regulatory barriers and implement stable frameworks to facilitate the uptake of corporate renewable electricity sourcing.

#3. Accessibility: Create an electricity market structure that allows for direct trade between corporate buyers of all sizes and renewable electricity suppliers.

#4. Availability: Work with utilities or electricity suppliers to provide options for corporate renewable electricity sourcing.

#5. Investment: Promote direct investments in on-site and off-site renewable electricity projects.

#6. Accountability: Support a credible and transparent system for issuing, tracking, and certifying competitively priced Environmental Attribute Certificates (EACs).

South Korea RE100 Localised Policy Messages

- Create a policy environment with a fair and transparent power market structure to enable renewables to compete on an equal footing to fossil fuels**
 - Shift pricing to ensure it reflects the true cost of renewable energy production
 - Strengthen independence and sustainability considerations within the electricity systems operator
- Increase the renewable energy target and implement stable policy frameworks to accelerate corporate uptake of renewable electricity**
 - Increase renewable energy target in line with 2050 Carbon Neutrality Goal
 - Include wording around the expansion of Power Purchase Agreements¹ (PPAs) in any government roadmaps
- Remove obstacles to improve accessibility of Power Purchase Agreements for corporates**
 - Ensure network usage fee and incidental costs are fair and transparent
 - Remove unfair contractual obligations
 - Simplify negotiation procedures and provide clear guidelines to support corporates through the procurement process
- Enhance grid flexibility and fairness for renewable electricity generators to scale the domestic supply of renewable electricity**
 - Ensure equal grid access and fair compensation for renewable electricity generators
 - Promote investment in systems that increase grid flexibility to allow renewables to rapidly scale up
- Improve the renewables investment environment for on-site and off-site PPAs**
 - Streamline siting and permitting rules
 - Improve cost effectiveness of investment
 - Provide clarity around incidental costs associated with on-site and off-site PPAs
- Enhance transparency, sustainability and additionality of renewable electricity certificates and tracking systems**
 - Differentiate between different renewable sources of power under Green Premiums in advance of auctions
