

IESR Vacancy

Energy Policy and Market Analyst

Background

Institute for Essential Services Reform (IESR), a think tank in energy and environment, aims to transform Indonesia's energy sector to reach net-zero emissions by 2050. The Energy Policy and Market Analyst will be responsible for conducting analysis on Indonesia's current energy policy and market structure and generating knowledge products that are relevant to the challenges of Indonesia's energy transition. The results of the analyst's work will be communicated to relevant stakeholders as part of the IESR's advocacy for the energy transition in Indonesia.

About the Position

IESR is looking for an Energy Policy and Market Analyst. The person in this position will be part of the IESR's Social, Policy, and Economy (SPE) Research Group and will contribute to the evidence-building and advocacy process of IESR. The person is responsible in conducting an in-dept analysis on energy policy and market to support various research projects, including the identification of energy policy and market reform to support the acceleration of energy transition in Indonesia and assessing the implication of the reform to the socio-economy aspects, e.g. poverty, jobs, commodity prices.

IESR is seeking a highly motivated, experienced, and qualified candidate to join our dynamic team.

A. Responsibilities and Tasks

The responsibilities of the Energy Policy and Market Analyst shall include, but not limited to, the following:

- Map and analyze Indonesia's current energy policy and market (with a particular emphasize in the power market structure) landscape
- Identify potential reforms that are possible to deploy within the upcoming years, taking into reference the policy reform proposed in the Just Energy Transition Partnership (JETP) Comprehensive Investment and Policy Plan (CIPP)

- Participate in research projects, particularly ones that involve the analysis of policy, market, and socioeconomics
- Contribute to the writing and/or production of related knowledge products (i.e. research reports, policy briefs, webtools, infographics, slide decks, etc.)

B. Qualifications, competencies and experience

- Minimum Bachelor's in the field of energy policy, economics, energy or environmental engineering, development studies, or other relevant discipline from reputable universities with 2 years experience. Master's degree or above is preferable
- Minimum 2 years of working experience in market, socioeconomics, and policy impact analyses.
- Excellent understanding of climate, energy, and environmental issues.
- Understanding of energy market and renewable energy procurement process is an advantage
- Understanding of correlation of socioeconomics and energy policy is an advantage
- Experience in managing and analyzing datasets of energy and/or socioeconomic statistics
- Familiarity with the JETP process is highly valuable
- Proficiency in using Microsoft Office software, especially Excel (including macros and pivot tables); programming skill will be an advantage
- Excellent written and oral knowledge of Bahasa Indonesia and English, including the ability to write a report/technical/briefing/policy paper
- Ability to work in an intercultural environment
- Willingness to learn and adaptability for new and relevant knowledge
- Excellent time-management skills

C. Duration

The position is for three years contract and can be extended with 3 months' probation. Expected starting date is **March 2025**

D. Salary

The salary will be commensurate with the candidate's qualifications and experience.

E. How to apply

- Candidate to download application from IESR's website.
- Send the completed application form together with an application letter and latest CV, recommendation letter to hrd@iesr.or.id before **February 28, 2025**
- Only qualified candidate will be called for interviews.
