

**Bidding Evaluation Result for
Developer for additional visualization and features on coalradar.id / radarbatubara.id
related to captive fossil-fueled power plant**

To all bid participants
and all others that may have concerns,

We thank all the institutions and/or individuals who have submitted their proposals in response to IESR's Request for Proposal (RFP) - Web Developer for additional visualization and features on coalradar.id / radarbatubara.id related to captive fossil-fueled power plant. Since the RFP was issued on 15 May 2025, until 4 June 2025, through two extensions, we received 2 (two) proposals from Simpul and DaunDigital. Considering the urgent study needs and the tight timeline, the evaluation process was conducted.

Based on the assessment results during the evaluation process, following the internal IESR process. We hereby announce that **DaunDigital** complies with the qualifications and requirements to conduct development for additional visualization and features on coalradar.id / radarbatubara.id related to captive-fossil-fueled power plants, thus winning the bid. This announcement is made as part of IESR's commitment to promoting transparency and accountability in the bidding process.

With best regards,

Deon Arinaldo
Energy System Transformation Program Manager
